Technologies Used : Angular7, Java Spring Boot, MongoDB

Feb 2018 - **BillSplit**.
March 2018 This project is aimed at developing an android based mobile application to make it easy to split bills with friends and family. The application organizes all shared expenses at one place, so that everyone can see who they owe. All user can get access to all data anywhere and anytime on their android devices. This project eliminates the need to keep the receipts of every shared expenses.

Technologies Used : Java, XML, Firebase Database (Provided By Google) using JSON

Sep 2017 - Oct 2017	**Online Job Portal**. This project is developed as a part of course-work of subject "Software Engineering". This system make connections of Job Seekers and Job Providers chaos free by providing online platform. In this system, Job Providers can post job vacancies and and Job Seekers can apply to those jobs. Job Providers can also select job aspirants and send them details for an Interview. The focus of this system is to provide an interface which is user-flexible with reduced man-power. Technologies Used : ASP.NET, AJAX, Bootstrap, MySQL Database
Feb 2017 - March 2017	**Store Locator**. This system provides an interface to find various stores, hotels, hospitals etc. within range of requested kilometers from a person's location. It shows detailed information of all stores and distance in kilometers from given location on MAP. Store Owners can register their stores with its details on this system. Technologies Used : PHP, Google MAP API, Materialize CSS, MySQL Database, JavaScript

Technical Knowledge

Languages	C, Java, C#, Android, SQL, Python
Web Technologies	HTML, PHP, ASP.NET, XML, Angular
Database	Oracle, MySQL, Firebase, MongoDB
Tools	VisualStudio, RoboMongo, Android Studio, Eclipse, NetBeans, GIT, SVN

Achievements and Co-curricular Activities

- Cleared **NPTEL Online Certification** in **Fundamental of Database Systems** course with **Elite Certificate** securing position in **Top 5%** Candidates ,within duration of Jul-Sep 2017.
